Projects

Apartment Dimitrieski
August 2015 - September 2015

Web application done in Wordpress. The work included modifying existing theme and plugins using CSS and JavaScript and enabling easy maintenance of the website by people with poor computer skills.

Web shop application
June 2015 - July 2015

Individual faculty project in which a web shop application was built with options of viewing, buying and administrating assortment. Application was done as single-paged, using JavaScript, jQuery, AJAX calls, REST services and Bootstrap CSS framework.

Business application
June 2015 - June 2015

Faculty project done in a team of two. Desktop application modeled in PowerDesigner tool and built using Java Swing, JDBC and SQL Server. We implemented the logic of warehousing along with all the needed documents and their movement.

Vuksar d.o.o.
October 2013 - November 2013.

- *Creating a program using Excel VBA, that is used for creating and archiving invoices as well as creating reports based on archived invoices.*
